SUMMARY

Passionate AI/ML Engineer with a strong background in deep learning, computer vision, and natural language processing. Proficient in Python, C++, TensorFlow, PyTorch, and a wide range of machine learning libraries. Experienced in building full-stack AI applications using Django, Django REST Framework, PostgreSQL, HTML, and CSS. Well-versed with modern AI tools such as Hugging Face, LangChain, FAISS, and Streamlit. Known for excellent problem-solving, research, and collaboration abilities. Seeking a challenging role to develop and deploy cutting-edge AI-driven solutions.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL, JavaScript, HTML, CSS

Deep Learning Frameworks: Django, Django REST framework, TensorFlow, Streamlit, HuggingFace, LangChain, FAISS

Libraries & Tools: NumPy, Pandas, Scikit-learn, PostgreSQL, VScode, Git, Hugging Face Transformers, LangChain

PROJECTS

DevSearch

April 2025 – May 2025

Full Stack Project – GitHub

Python, Django, Django REST framework, PostgreSQL

- Developed a Full-Stack platform serving 10+ developers to connect and share projects using Django
- Implemented a secure login/register system using JWT tokens with automated email delivery for 10+ accounts
- Constructed a REST API with 10+ endpoints using Django REST Framework and tested using Postman to interact with an external application's frontend

StudyBuddy

Aug 2024 – Sep 2024

Full Stack Web Project – GitHub

Python, Django, PostgreSQL, HTML, CSS

- Engineered a Django-based website used by 15+ users to create topic-specific rooms for discussions
- Built a real-time recent activity feed showcasing the latest 20+ comments and messages across rooms
- Established 5+ efficient database models using Django ORM and secure user authentication system

AI Medibot Assistant

June 2025 – June 2025

Deep Learning Project – GitHub

Python, HuggingFace, LangChain, FAISS, Streamlit

- Engineered an AI medical chatbot using Retrieval-Augmented Generation (RAG) pipeline, integrating Mistral LLM and Langchain to answer user queries based on medical PDFs
- Built a vector-based memory by chunking documents, generating embeddings using HuggingFace models, and storing them in FAISS for fast retrieval
- Crafted a scalable, UI-driven chatbot using Streamlit, demonstrating end-to-end understanding of inference, embedding, and deployment in DL workflows

EXPERIENCE

Google Generative AI Intern

May 2025 – June 2025

SmartBridge

Remote

- Gained hands-on experience with Generative AI tools using Google Cloud Vertex AI, prompt engineering, and model tuning
- Completed all academic and project work including building and deploying generative AI models such as GPT-Neo
- Explored use-cases such as text summarization, image generation, and conversational AI in cloud environments

Artificial Intelligence Intern

Jan 2024 – Mar 2024

InternsElite

Remote

- Completed a structured internship program in Artificial Intelligence, contributing to real-world AI projects
- Gained hands-on experience in machine learning algorithms, model evaluation, and data preprocessing
- Demonstrated problem-solving skills and applied AI concepts to develop functional solutions

EDUCATION

VIT Bhopal University
B.Tech in Computer Science, Artificial Intelligence & Machine Learning

Bhopal, MP
Sep 2023 – Sep 2027

CERTIFICATIONS

- GOOGLE CLOUD Generative AI – Credly
- IBM Cloud Certificate – IBM Cloud
- Microsoft Certified: Azure Data Fundamentals – Azure
